

William Price

**Vice President, Geothermal Engineering and Construction
Enel Green Power North America, Inc.**

William Price is the Vice President of Geothermal Engineering and Construction at Enel Green Power North America, Inc. (EGP-NA) responsible for the execution of geothermal projects in North America. He joined EGP-NA in 2007.

Mr. Price was the Project Manager for the construction and commissioning of the Stillwater and Salt Wells Geothermal Projects located in Fallon, Nevada, which were placed in service in 2009. Currently, he is leading the engineering and construction of solar projects integrated with EGP-NA's geothermal facilities.

Mr. Price has 29 years of experience in the power industry, the past 23 specifically involved in geothermal business development, operations, maintenance, engineering and construction. He began his career in the U.S. Navy in 1982, and graduated at the top of his class in the Nuclear Power Program. After completing his government service, Mr. Price became involved with the Coso Geothermal Field and was part of the construction and operations team that expanded Coso from a 30 MW dual flash steam facility to a 240 MW project spread over four different sites. In 1992 he became the general manager of the 24 MW Steamboat Binary Geothermal Project.

Price is well known in the industry as the pioneer of geothermal submersible pump technology and advancements in binary technology.
