

**Stephen Pike**  
**Vice President, Operations and Maintenance**  
**Enel Green Power North America, Inc.**

Stephen Pike has been with Enel Green Power North America, Inc. (EGP-NA) and its predecessor companies since 1994. In the beginning of his career with EGP-NA, Mr. Pike was responsible for project engineering, project management, and operation and maintenance management for the Company's wind and hydropower assets.

Mr. Pike currently serves as EGP-NA's Vice President of Operations and Maintenance overseeing the Company's existing portfolio of operating assets consisting of more than 70 individual power generating facilities utilizing four separate generation technologies and including more than 800 MW of generating capacity. Mr. Pike also provides support, as needed, to the business development and engineering and construction divisions of EGP-NA as the operations liaison to support the growth and construction of new generating assets.

Prior to joining EGP-NA, Mr. Pike was a consulting engineer for Rivers Engineering, specializing in municipal and renewable energy projects. He holds bachelor's degree in civil engineering from the University of New Hampshire.
