ENEL GREEN POWER STRENGTHENS ITS LEADERSHIP IN RENEWABLE ENERGIES IN THE CANARY ISLANDS WITH THE AWARD OF 43.32 MW AND IS COMMITTED TO STORAGE

- It will undertake five photovoltaic projects in Fuerteventura and Gran Canaria, three of which include storage systems.

**Madrid, 15 March 2021.**—Enel Green Power was awarded 43.32 MW in the first call for investment aid for photovoltaic installations co-financed with ERDF Community Funds (SOLCAN) undertaken in the Canary Islands. The provisional decision granted Enel Green Power España (EGPE), aid for the five projects for which it bid, distributed between Fuerteventura and Gran Canaria. Construction of the five photovoltaic parks will begin during the last quarter of this year, and commercial operations will be initiated during the next financial year.

Enel Green Power was specifically awarded 7 MW of power for the installation of the Arguineguín 2 photovoltaic park and 10.68 MW for the Lomo Gordo park, both with storage facilities, in Gran Canaria. In Fuerteventura the company was authorised to construct installations in Quebrada del Mojeque (10.11 MW), Puerto Lajas (7.98 MW) and Corralejo 1 (7.54 MW), the latter with storage capacity.

Enel Green Power’s five projects account for 17.7% of the capacity allocated in the 65 projects assigned with a total of 244 MW of power.

This new photovoltaic power is in addition to the 16 MW of wind capacity awarded in 2019 to EGPE at the EOLCAN I auction for the development of the Granadilla wind farm and confirms Enel Green Power’s commitment to boosting the development of renewable energies and decarbonisation in the Canary Islands.

Power generation in the wind farms with the participation of Enel Green Power in the Canary Islands through EGPE added 151,522.4 MWh at the end of 2020, equivalent to supplying more than 43,400 of the island’s homes with renewable energy.
Enel Green Power España manages 15 wind farms in the Canary Islands with a total of 63.7 MW of installed power, and in which it participates together with a number of institutions, both public and private. By island, they are distributed as follows: 5 parks in Gran Canaria, 5 in Tenerife, 2 in La Palma, 1 in Fuerteventura, 1 in Lanzarote and 1 in La Gomera.

**Enel Green Power**, within the Enel Group, is engaged in the development and operation of renewables worldwide, with a presence in Europe, America, Asia, Africa and Oceania. Enel Green Power is a global leader in green energy and has installed capacity of almost 49 GW with a generation mix that includes wind, solar, geothermal and hydroelectric. It is spearheading the integration of innovative technology at its renewable energy plants.
